REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The Applicant claims a nonaqueous electrolyte secondary battery comprising a lithium transition metal complex oxide having a BET specific surface area of less than 3 m²/g and gives a pH value within the range of 10.61-11.0 when immersed in purified water in the amount of 5 g per 50 ml of the purified water, an outer casing composed at least partly of aluminum alloy or aluminum laminate film having a thickness of up to 0.5 mm.

In the prior art of record, Inamasu, JP 07-142093, disclose a battery wherein the pH of the lithium transition metal complex oxide is 10 or less. Whereas, the present invention provides unexpected results of improved suppression of gas evolution during high-temperature storage in a charged state when the lithium transition metal complex oxide gives a pH value within the range of 10.61-11.0 as recited in the claims (Table 1).

Thus, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a nonaqueous electrolyte secondary battery comprising a lithium transition metal complex oxide having a BET specific surface area of less than 3 m²/g and gives a pH value within the range of 10.61-11.0 when immersed in purified water in the amount of 5 g per 50 ml of the purified water.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angela J. Martin whose telephone number is (571)272-1288. The examiner can normally be reached on Monday-Friday from 10:00 am to 6:00 pm.
